Subject: 2nd Quarter 1999 WB Television Network Commercial Information
And Educational Programs

WB Educational Programming

Attached is a list of 2nd Quarter 1999 WB Children's Programming for your public files. Episodic descriptions of The WB's educational program entitled "**Histeria!**" are also attached.

Certification

Attached is a Certification by The WB Network that all children's programs scheduled for broadcast during the second quarter of 1999 were formatted to comply with the commercial limits of the FCC rules implementing the Children's Television Act of 1990. Also, the "E/I" notation represents "core" educational programming on The WB that meet the FCC educational programming three (3) hour processing guideline.

First Quarter/Revised Confirmation

The First Quarter 1999 Confirmation is revised to state the following: The number of minutes allotted for network and local commercials exceeded the limits set forth in the FCC rules implementing the Children's Television Act of 1990 during the first quarter of 1999. On the weekend of February 20, 1999 we inadvertently started the broadcast of Pokemon at 9:59 am. As a result of such, two additional :30 second commercial units intended for broadcast at 10:00 am were aired within the prior hour, exceeding the mandated 10:30 minutes of commercials per clock hour.

Second Quarter/Confirmation

The number of minutes allotted for network and local commercials did not exceed the limits set forth in the FCC rules implementing the Children's Television Act of 1990 during the second quarter of 1999. The number of commercial minutes for the second quarter of 1999 have been included in the broadcast formats forwarded to your station prior to each air date.

The Certification and the Quarterly Confirmation are designed to furnish you with additional information concerning the commercial matter contained in the network's children's programs, and to enable you to more easily comply with the requirements of the Children's Television Act of 1990.

CERTIFICATION

The following is a list of all WB Television Network programs produced and broadcast for an audience of children twelve years old and younger that were scheduled for broadcast during the second quarter of 1999. This certifies that each of these programs were formatted to allow for no more than 10.5 minutes of commercial time per hour on weekends and 12 minutes of commercial time per hour on weekdays. The actual number of commercial minutes were included in the network traffic reports for the second quarter of 1999, which each affiliated station has received heretofore.

Warner Bros.' *Histeria!*™
Statement of Educational Mission

as prepared by Miki Baumgarten, PhD.
for Warner Bros. Television Animation

Target Audience:

The target audience for this series is made up of six to twelve year-old boys and girls across a wide spectrum of socio-economic, racial and ethnic classifications. Materials will anchor in the center of the age range, thus challenging younger viewers and reinforcing learning for older viewers.

Overall Educational Objective and Rationale:

Above all, *Histeria* is intended to spark an interest in and love of history in the minds and hearts of young viewers.

In an effort to prepare youngsters to take a functional role in society, today's schools are placing a heavy emphasis on the teaching of basic skills -- reading, writing, mathematics, and elementary science. Insufficient time and energy is commonly spent on other core school subjects, including history, literature, social sciences, art, and music. Only especially motivated and advanced students are likely to achieve a sufficient breadth and depth of historical knowledge in a contemporary school setting.

A thorough knowledge of history, nevertheless, is vital for many reasons. Among other things, historical knowledge can give youngsters a sense of where they came from and who they are, thereby enhancing their self-acceptance and self-esteem. By analyzing past motivations, actions, and their results, youngsters can gain a basis for present-day performance and decision-making.

Historical knowledge can also be a source of enjoyment, inspiration, and general enlightenment. By combining facts and comedy, *Histeria* is intended to keep history alive, supply youngsters with a portion of the historical frame of reference missing in the schools, and challenge them to proceed with future learning.

Educational Format:

The learning objective and goals are fully integrated with the story-lines, characters and the historical settings dealt with in *Histeria*. In this way, new knowledge and learning skills become part of the overall fun of the series.

Educational Goals:

- To bring viewers an awareness of and appreciation for history and historical topics.
- To increase viewers' core historical knowledge base -- including fact-based knowledge and generalized knowledge of historical trends, themes, and movements. Series episodes deal with a wide range of historical topics and subtopics, including: American History, World History, Political History, Scientific History, Ancient History, Art History, Music History, and more.
- To enhance viewers knowledge and understanding of different ethnic, religious, geographical, cultural and gender-based groups throughout history and in modern times, in order to increase tolerance and promote diversity.
- To enhance viewers' vital "learning to learn" skills, including, questioning, observation, and fact finding -- useful for historical investigation as well as investigation into other content areas.
- To help viewers learn to exercise logic, judgment and analysis in order to assess the veracity and worth of new historical knowledge presented.
